

Boston M. Cox

Champaign, IL | 309-657-7205 | bmcox2@illinois.edu | [linkedin.com/in/boston-cox-815712285](https://www.linkedin.com/in/boston-cox-815712285) | github.com/bmcox2

EDUCATION

University of Illinois Urbana-Champaign

Expected May 2028

B.S. in Computer Science, Grainger College of Engineering | GPA: 3.83

Relevant Coursework: Data Structures, Computer Architecture, Discrete Structures

Fall 2026 (in progress): Systems Programming, Database Systems, Probability & Statistics for CS

Parkland College

May 2026

A.S. in Computer Science | GPA: 3.84 (Parkland Pathway to UIUC)

TECHNICAL SKILLS

Languages: Java, C++, JavaScript/TypeScript, Kotlin, SQL, MIPS Assembly

Frameworks & Tools: React Native, Expo, SQLite, Git/GitHub, Linux, Android Studio, Visual Studio

Familiar With: Next.js, Supabase, PostgreSQL

PROJECTS

Exercise Logger: Mobile Fitness Tracker

June 2026 – Present

Personal Project | React Native, TypeScript, Expo, SQLite | github.com/bmcox2/exercise-logger-mobile

- Independently designing and building a full-stack iOS fitness app, from the UI down through the database, following a self-directed requirements-and-milestone plan instead of building ad hoc
- Built the workout list and detail screens plus a searchable 873-exercise library using React Navigation with tab-based routing, testing live on-device via Expo Go
- Designed a normalized relational schema in SQLite, using foreign-key relationships and junction tables to model many-to-many muscle-group data, with transaction-wrapped writes to guarantee integrity across nested inserts
- Diagnosed and fixed a startup race condition between database initialization and UI rendering, and refactored a growing data-fetch function into smaller, testable helpers as the codebase scaled
- Actively extending the app with a workout-building interface; fully documented and version-controlled on GitHub

Command-Line Workout Logger

May – June 2026

Personal Project | C++

- Built a terminal-based fitness tracker in C++ using custom Workout and Exercise classes, with file I/O and JSON serialization handling data persistence; the foundational version that preceded the mobile rebuild above

WORK EXPERIENCE

Taco Bell

May 2022 – Present

Shift Leader/Manager

Washington, IL

- Authored a new mid-shift procedures guide that is now the standard training material for all incoming shift leads
- Recognized as a top-performing shift lead and repeatedly offered advancement; regularly asked to return during school breaks specifically to train incoming shift leads
- Trained new employees and helped strengthen team culture across 5+ additional locations in the district
- Navigate daily operational pressure, from rushes and equipment failures to callouts and interpersonal conflict, while managing performance issues such as coaching, write-ups, and terminations

EXTRACURRICULAR ACTIVITIES

Kappa Sigma Fraternity

Nov 2024 – Present

Risk Manager & House Manager

Urbana, IL

- Designed a committee point system to standardize workload across risk-management roles (event security, sober monitor, sober driver); adopted house-wide across all committees after proving effective
- Revised event risk-management protocols, noticeably reducing incidents at fraternity-hosted events
- Managed a \$5,000 semester budget, coming in under budget through disciplined purchasing, while independently renovating a mold-damaged, unusable basement into a functional chapter room and lounge. Built the furniture myself and installed a dehumidifier system to stop the recurring damage
- Designed and implemented the house's first formal move-out process, negotiating member and alumni-board interests and introducing room inspections to establish damage accountability for the first time
